

# Tungsten 1K & 2KW

The CMC 1000/2000W Studio Series is ideal for use where compact, lightweight Tungsten Fresnel spotlights are required. These middle size units are perfect for studios where grid height is a problem and electric power is limited. The classic construction of corrosion resistant extruded and die cast aluminum maximizes body strength while maintaining the light weight of an ideal location fixture.

Despite the small size, short focal length lenses with wider angles give more light output and better light distribution over the full beam area making them the most popular and sold units from the long range of CINEMILLS Tungsten's.
