

2.5/4K HMI PAR

The CMC Silver Bullet 2.5/4K PAR's are the work horses of the industry capable of using either 2500W or a 4000W single ended lamp with a focusing mechanism to correct positions of the selected lamp into place. Whenever punch or bounce light is required on a set, a PAR is the ultimate answer. The interaction of lamp, reflector and converter lens has been computer simulated, resulting in unmatched light performance. A wide range of converter lenses and globe movement ensure maximum beam control in all situations. Compatible with all major 2.5KW or 4KW magnetic and electronic ballasts.

Specifications	
Power	4000W/2500W
Supply Voltage	190-240v 50-60hz
Color Temperature	5600K
Measurements	30.3/19.3/23.2" 770/490/590mm
Weight	55lbs (25kg)
Lamp Type	HMI 2500W/SE 4000W S/E
Lamp Base	G38
UV Lens Diameter	11.8" (300mm)
Protection Class	IP 23
Compliance	CE
