

Tungsten 150/300/650W

The CMC Studio Series is ideal for use where compact, lightweight Tungsten Fresnel spotlights are required. The smaller units are perfect for studios where grid height is a problem. The classic construction of corrosion resistant extruded and die cast aluminum maximizes body strength while maintaining the light weight of an ideal location fixture. Despite the small size, short focal length lenses with wider angles give more light output and better light distribution over the full beam area.
